# Strip Packing Machine

The Original. The Best

**Gansons Strip Packing Machine** packs a wide range of products into easily dispensable strips with economy and speed.

It handles a wide variety of products such as coated and un-coated tablets of different sizes/shapes, hard and soft gelatin capsules, confectionary products including lozenges, toffees and chewing gum as well as electronic devices, among others.

It has a capacity between 500 units/minute to 2,500 units/minute. Models from 2 tracks to 20 tracks are available. Strip packing machines include value added features such as no-fill / no-foil detection systems and photo print registration systems.
